

## Indiana Convention Center and RCA Dome Indianapolis, Indiana

The Indiana Convention Center and RCA Dome consistently receives rave reviews as a spectacular convention and trade show facility. It required an intense effort and extensive coordination from the entire design team.

The combined challenges of fast-track construction schedules, long spans, large column-free spaces, tall story heights, heavy live loads, and irregular geometry demanded innovative and cost-effective design solutions. The project was completed within budget.

Each bid package was carefully monitored and scrutinized with value engineering efforts.
