

## **Emmis Broadcasting Corporate Headquarters Indianapolis, Indiana**

The Monument Circle building is composed of four distinct facades: the Emmis “tower”, the forecourt entry façade, the modern glass curtain wall, and the “journal” façade.

Each façade represents something from the history of Monument Circle or the future of Emmis Broadcasting.

Fink Roberts & Petrie’s services were the structural design for the 8-story corporate headquarters of Emmis Broadcasting, located on the Circle in downtown Indianapolis. In an effort to maintain the unique architectural look of the Circle, an existing 4-story building is incorporated in the design, blending the historic with the new.

The Emmis Building consists of several building levels which will have office areas, terraces, a gallaria, and a 3-story entry with an atrium on the lower level as well as a 4-story atrium on the upper level.
