

Southeast Regional Treatment Center Madison, Indiana

Building Square Footage: 96,000 sf (new)
120,000 sf (existing renovation)

Project Completion: 2005

The project involved a combination of renovating 100 year old wood frame buildings and new construction. The new construction was steel framed buildings.

The project updated and supplemented the existing buildings in order to provide a state-of-the-art facility to more effectively service patients with mental illnesses.
