

Hanover College Science Center Hanover, Indiana

Building Square Footage: 76,200 sf (new)
30,300 sf (existing renovation)

Project Completed: 2000

The project consists of a new two-story building adjacent to an existing building. It houses classroom and laboratory space for the various science departments at the college, as well as administrative offices. The structural steel frame is clad with traditional brick architecture tying in with the historic campus. The building is topped with a copper standing seam mansard roof system complete with a widow's walk and cupola.

The structural system was designed and released prior to the completion of the architectural and M/E/P design to help facilitate meeting the construction schedule.
