

Summers Street Parking Facility

Charleston Municipal Parking Garages Charleston, West Virginia

The Charleston Municipal Parking Garages involved two facilities:

Summers Street Garage – 720 cars on 7 levels

Shanklin Parking Garage – 525 cars on 4 levels

Each garage consists of a pretopped, precast concrete frame with cast-in-place concrete pour strips. This system was selected for the durability of its driving surface as well as its economical initial construction cost.

Each parking garage has one structurally independent stair/elevator tower framed in structural steel.

Project Owner: City of Charleston
Mr. Sam Houston
304-757-7376

Schedule: Target: March 1996
Actual: January 1996

Cost: Budget: \$12,000,000
Actual: \$9,104,530
